NiteLab®

**Industry's First Professional Portable Lighting LED Brand**

Both NiteLab and NITECORE belong to SYSMAX which is dedicated to exploring LED technology to reinvent the portable lighting LED solutions.

**UHi LED**

**Ultra High Intensity**

New Generation Tailor-Made Portable Lighting LED

- UHi 10   UHi 20/MAX   UHi 25   UHi 40/MAX   UHi 50   UHi 100

**LED New Benchmark**

NiteLab cooperated with an industrial partner to jointly develop the UHi LED Series, specially designed for portable lighting. Featuring high light density and ultra high beam intensity, the UHi LED utilizes the round light emitting surface (LES) to achieve an optimal lighting effect and beam distance, which challenges the impossible and begins a new era.

**UHE LED**

**Ultra High Efficiency**

UHE, short for Ultra High Efficiency, represents NiteLab's pioneering development in LEDs and is specifically designed for high performance gear such as headlamps. It delivers enhanced efficiency per watt, offering a brighter, more energy-efficient, and long-lasting lighting experience.

MCT stands for Multiple Color Temperatures. The MCT LEDs, developed by NiteLab based on UHE LEDs, offer both multiple color temperatures and high luminous efficiency.

NITECORE Models: NU27, HA23 UHE

**LUMIN SHIELD™**

LUMIN SHIELD™, specially designed by NITECORE, enables an instant defense with a blazing output thanks to a multi-core UHi MAX LED. This technology is engineered to provide an unprecedented wide-area protective coverage, resembling a shield.

## Ultraviolet

The UV light has shorter wavelengths than visible light, and is also known as black light. Ultraviolet LED flashlights are useful in many applications, including identifying forged documents, tracing marked bills, leakage/grease inspection, sanitary check, hunting scorpions etc.

NITECORE Models: TIKI, TIKI UV, THUMB LEO

## Infrared

The IR light is with wavelengths longer than those of visible light. Extensive uses for military and civilian applications include target acquisition, surveillance, night vision, homing, and tracking.

NITECORE Models: CI7, NU06 MI

## STROBE READY™

In law enforcement, the strobe flashlight for self-defense is used on potential suspects who may present a danger but are not lethally armed. The strobe light is disorienting to the person it is aimed at which makes it difficult for them to concentrate. Also, they avert their eyes away from the strobing effect. This means it is easier for the police to subdue successfully and control the suspect.

**STROBE READY™!**  
ULTIMATE ONE-HANDED OPERATION

### 2<sup>nd</sup> Generation STROBE READY™ Technology

The 2<sup>nd</sup> Generation STROBE READY™ Technology is specially designed by NITECORE for tactical applications to enable a quick access to STROBE Mode with the dual tail switches and the inset pedal design to avoid accidental activation.

NITECORE Models: P10i, P20i UV, P10iX, P20iX, P20UV V2, CI7

- 1 Specially designed for tactical applications to enable a quick access to STROBE Mode (Patent No. ZL201320545349.4)
- 2 Inset pedal design to avoid accidental activation (US Patent No. 15/846299 US10237955B1)

## Advanced Randomly Changing STROBE Mode

The randomly changing frequencies available in the STROBE Mode of the latest NITECORE models can cause stronger dizzying effects due to the inadaptability of the naked eyes.

NITECORE Models: P10i, P20i UV, P10iX, P20iX, CI7

## TurboReady™

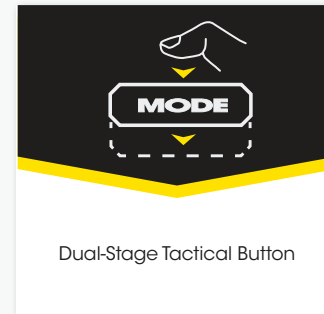

NITECORE aims to lead a trend of new tactics with the TurboReady™ technology to enable an instant dazzle strike with a blazing tactical output, in order to produce an abrupt disturbance to your adversary during the day or at night.

NITECORE Models: TM20K, TM12K

# PATENTS

With advanced technologies and technical personnel, NITECORE has been keeping innovating over the years and has harvested over one hundred invention patents and utility model patents.

# QUALITY ASSURANCE

NITECORE products combine advanced technology with precise design, undergo rigorous testing, and meet industry standards to deliver exceptional performance.

## Luminous Flux Testing

NITECORE uses integrating spheres to accurately evaluate data such as luminous flux and color temperature.

## Button Life Testing

NITECORE uses a button life testing machine to determine the buttons' durability and the compressive strength of the internal structure.

## High and Low Temperature Testing

NITECORE uses a constant temperature and humidity test chamber to test the product performance in extreme temperature and humidity.

## Aging Testing

NITECORE adjusts the product to its highest output and test its reliability by simulating long-term use conditions to ensure quality before shipment.

## Battery Safety Testing

Rigorous tests are carried out on the battery, as well as to check the performance and lifespan of the battery in extreme environments.

# WHEN THERE IS DARKNESS THERE IS A NITECORE LIGHT

NITECORE LED lights are standard equipment for military and law enforcement in various countries, as well as professional gear favored by outdoor enthusiasts around the world. This proves NITECORE to be the ideal choice for outdoor adventures, law enforcement, trail running, industrial lighting and many other fields.

## Hiking/Trekking

Generally, lights for hiking not only require high output but also light weight, long duration and reliability. For team leaders, high output and far-reaching spotlights help them to see the path ahead, and a red caution light makes it easier for their team members to find and follow them.

Recommended Models: NU27, NU25, NU33, NU40, NU43, NU50, HA13

## Running

For long distance running, runners may prefer a lightweight headlamp with flood light and long runtime. High output and red caution light are required when necessary. For those who enjoy leisurely urban night running, a high performance headlamp ensures their safety in running.

Recommended Models: NU27, UT27, NU25, HA11, NU31, NU25 UL, HA13

## Caving

Due to the dangerous and low-light environment in caves, high output lights are required for caving. Since there is water in caves and the temperature is low, low temperature resistance and waterproofness are necessary. Ruggedness are also paramount.

Recommended Models: HC60 UHE, HC65 UHE, NU33, NU40, NU43

## Climbing

Considering the harsh environment at high altitude, a headlamp with high intensity, long runtime and grand throw is essential. For freezing environments, low temperature resistance is required to maintain stable performance of lights. Hands-free and lightweight products are more popular.

Recommended Models: HC60 UHE, HC65 UHE, NU43, NU50, HA13

## Camping

For camping, a lightweight and portable lantern with a loop or magnetic base may be the most convenient to set hands free. Besides high output, it also requires soft beam with high colour rendering index, long duration and more.

Recommended Models: NU27, NU25, LR40, LR70, Bubble, NU33, NU31, NU40, NU43

## Search & Rescue

For search and rescue, a lighting tool should preferably have blinding lumens, superb beam distance as well as long runtime. Qualities like portability, ruggedness and light weight are also a plus.

Recommended Models: TM20K, P30i, NU43, NU50, MH12 Pro, P35i, MH25 Pro, MH40 Pro

## Military & Law Enforcement

For military and law enforcement applications, a simple and intuitive UI is crucial, and STROBE READY™ perfectly meets this need. Besides, it requires high output and tactical defense function. Using with bezel, tactical ring, gun mount and remote switch to enhance the tactical function overall.

Recommended Models: P20iX, P20UV V2, C17, P23i, NPL25, SRT7i

## Security

The lighting tools for security should have high output, long runtime and direct access to strobe. This kind of lighting tool should be highly reliable in resisting dust, water and shocks, and should be tough enough to confront contingencies.

Recommended Models: P23i, P20iX, P20UV V2, NU06 LE, NU07 LE, SRT7i

## Hunting

A hunting light should have high output with optimal beam distance to ensure long range visibility. Light weight, compatibility with shotguns, ability to absorb recoil are also required. Colored outputs are preferred to preserve users' night adapted vision, or to not startle the preys.

Recommended Models: P30i, NEW P30, MH25 Pro, MH40 Pro, P35i

## EDC

EDC (Everyday Carry) is designed to be carried with you everyday, thus it must be ultra-compact, lightweight, and always works when you need it. It does not require multiple choices of brightness levels, whilst sufficient runtime and easy operation are necessary.

Recommended Models: EDC29, EDC27, EDC25, EDC23, EDC31, EDC33, EDC35, T4K, TIP2, TIKI

## Industrial Workplace

Rechargeable lights are usually welcomed by industrial workers due to better cost performance. Hands-free capability, portability, an intuitive user interface are required to ensure convenience. For hazardous industries like mining or oil extraction, explosion-proof lights are mandatory.

Recommended Models: UT27, NU35, NU50, HC60 UHE, HC65 UHE, NWL20, HC70 UHE

## Cycling

Lighting with capability to illuminate blind spot ahead or under foot is essential to ensure safety in cycling. Features like multiple modes for different riding conditions, easy to operate, install or remove, flexible charging options, and compatibility with handlebars of various sizes also add up to a great bike light. A rear caution light is also necessary for maximum attention and safety.

Recommended Models: BM06 + HC60 UHE/HC65 UHE

## Fishing

Hands-free capability is paramount. Colored outputs are inconspicuous, especially blue light. Blue light will not alarm underwater wildlife, and is able to attract some fishes, and activate fluorescence of the float, which is why it is well received by fishermen or fishing enthusiasts.

Recommended Models: HA11, NU25, NU11

## Diving

A flashlight for diving needs to be totally waterproof and reliable, with high output, sufficient duration and flexibility. It is better to have a lanyard in case of loss. Red output is a plus for it serves as a supplementary lighting underwater.

Recommended Model: DL30

# UT

## UT Series

The UT Series is a brand new product line of NITECORE specially designed and optimized for trail runners in nighttime or in rain, snow or fog. Compared to marathons, trail races usually feature a longer distance, a steeper gradient and a longer duration with higher requirements on personal equipment, among which is the mandatory lighting gear.

### Efficient and Safe

## Ultrasonic Function

25kHz  
40kHz

Ideal for repelling pests, such as insects, mice, snakes, cockroaches, and more

## EMR Series

With the innovative heating system and safe activating method, the NITECORE EMR Series is specially designed for outdoor enthusiasts to repel mosquitoes or pests effectively. The EMR Series products are powered by the rechargeable Li-ion battery, minimizing the carbon footprint while providing users with a long-lasting protection zone.

### EMR Series

**Electronic Repeller**  
Can be recharged at any time for long-term use while it is safe, green, and efficient

### Conventional Repeller

**Fuel Powered**  
There is a need to carry and replace fuel, which is high consumption, not eco-friendly, and unapproved by airlines.
